

Switch

Save twice:

Costs & CO₂ emissions

Ultra concentrate

Savings from lower use of cleaning agent and less storage space

Reduced resource consumption & performance assurance certified by EU Ecolabel

Integrated dosing cap

Efficient cleaning processes & savings on dosing equipment

Safe handling of ultra concentrates & overdose prevention

Refill pouch

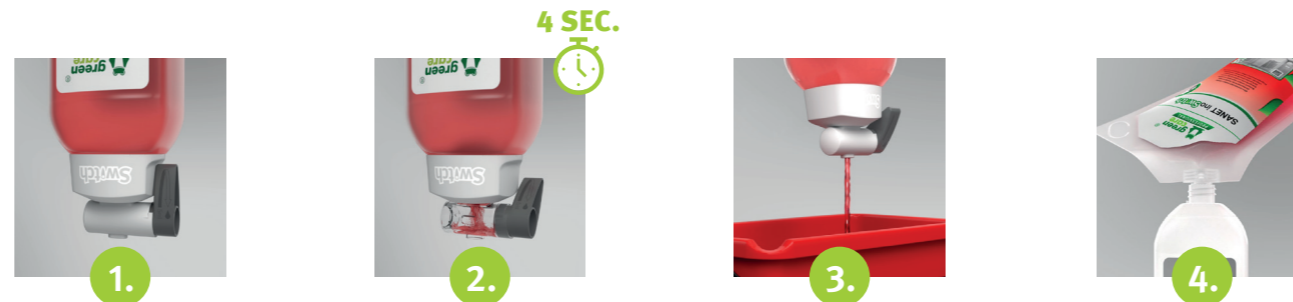

Cost-effective refilling with the one-litre pouch

Outstanding: 100% recyclable & 85% less packaging volume

Switch

Easy application:

1. Turn bottle upside down with the lever in neutral position.

2. Turn the lever away from you to fill the cap with 5 ml of formulation.

3. Turn the lever towards you, to let the formulation flow into the 4-litre bucket or the 750 ml spray bottle.

4. Remove the dosing cap to refill the bottle with the pouch.

Scan this code for the Switch system video instructions.

Small lever, big leverage

When you change to the new Switch system, your use of 10,000 litres of cleaning agents has the potential to avoid significant amounts of CO₂ emissions and crude oil and plastic consumption.

-4,330 kg CO₂ emissions

-1,379 kg Crude oil

-738 kg Plastic

*Basis of calculation: SANET inoSwitch one-litre bottle

Bottle with dosing cap & refill pouch

The dosing cap for 5 ml formulation guarantees exact dosing.

200 dosages for the 4 L bucket

200 dosages for the 750 ml spray bottle

The dosing scale on the side shows how much product remains.

Ultra-concentrated formulation meets the highest sustainability requirements and reduces use of cleaning agents.

Simple instructions: QR code linked to usage video

The bottle and cap made from 100% recyclate can be recycled completely.

No use of barrier materials and adhesives for complete recyclability.

Printed area is separate from the pouch itself and fused to it only at the edges.

“Very good recyclability, which cannot be optimized any further”

Interseroh

Compared to a bottle, the pouch saves up to 85% packaging volume.

Outstanding:

The pouch, spout and printed sleeve are made of a mono-material (polyethylene or PE). The pouch can be 100% recycled to a high quality.

Highest praise from independent institutions for the refill pouch:

Our Switch portfolio
