PRODUCT LINEUP

COMPANY PROFILE

20+ Years

Founded in May 2004, Pa Tin Da has grown into the largest microfiber manufacturer in southern China.

45,000 Square Meters

Current manufacturing plant with a structure of 15,000 M2.

Brand new manufacturing plant with 45,000 M2 under construction

10+ Automatic Production Lines

12 lines of automatic microfiber cloth cutting and sewing machine

Over 450 advanced production machines and equipment

5,500,000 pieces

5 million pieces: monthly production capacity of microfiber cleaning cloth

500,000 pieces: monthly production capacity of professional mops

Advanced R&D Capability

Pa Tin Da's R&D team is comprised of the pioneers of the microfiber industry that began in China in the 1990's. We are experts in raw materials, weaving and knitting, dyeing and finishing. In Pa Tin Da, new product development starts from raw material. As strategic partners of CFI (Guangdong Chemical Fiber Institute), we have early access to the latest technology in all kinds of synthetic materials.

What is microfiber?

Microfiber is a composite material composed of polyester and polyamide (nylon). To ensure high quality, fibers are split after knitting/weaving during manufacturing, which creates tiny spaces within. When observed in cross-section, microfiber resembles an asterisk. The split fibers in fabric, in tandem with the spaces, are excel at trapping dust, dirt, and liquid. This technology's synergy delivers exceptional cleaning and absorption capabilities across various applications.

Microfiber Cleans Better

How does microfiber work?

After the splitting technology, microfiber is divided into 8 segments, which enlarges the surface area of the fibers and increases the hole gap in the fabric, making it more absorbent like capillary core absorption.

Microfiber provides superior cleaning performance compared to cotton.

	Microfiber	Cotton
Cleaning Effectiveness	Pick up and trap 99.54% of dirt, dust and bacteria (w/ detergent cleaner)	Only pick up 67% of dirt, dust and bacteria (w/detergent cleaner) and will re-deposit 33% of that back onto the surfaces
Absorbency	Absorb up to 7 times of its own weight	Absorb only 2-3 times of its own weight
Durability	Withstand 250 -500 standard washes	Last around 50 to 60 washes
Labor Efficiency (sq ft/hour)	23,000 (based on ISSA 447 Cleaning Calculator)	5,000 (based on ISSA 447 Cleaning Calculator)

WHAT'S NEW?

Revolutionary Knitting Method from Pa Tin Da

After continuous exploration and research, Pa Ti Da's R&D team has improved the knitting method of the traditional microfiber terry towel. Through this new knitting method, the loops which are originally separated from each other now are intertwined with each other, resulting in a thicker and fluffier terry towel. The inter-knitting method terry provide more effective support for the loops from each other, making the loops of the terry towel stay more upright after washing, and keeping the towel soft for a longer period of time.

Discover the remarkable advantages of our MicroMax Cloth™:

Luxuriously Fluffy Loops: Experience the plush, fluffier loops that redefine your cleaning experience.

Unrivaled Loop Integrity: Our loops stand tall and unwavering after every laundry cycle, ensuring a perfect cloth for professional cleaning.

Supreme Thickness: Feel the difference with our cloth that boasts a thicker texture compared to regular microfiber terry, all while maintaining the same grams per square meter.

Distinctive Optics: Stand out from the crowd with the unique visual appeal of our MicroMax Cloth™. It's unlike any other microfiber towel on the market, making it a vital asset in your marketing efforts.

Elevate your cleaning game with MicroMax Cloth™, a testament to innovation and quality.

MicroMax Cloth™

MICROFIBER DOPE-DYED YARN & ITS APPLICATIONS

MICROFIBER DOPE DYED YARNS

Our dedicated R & D team keeps exploring new areas of yarn processing technology, such as microfiber dope dyed yarn. Dope dyeing is a method of coloring synthetic fibers at the polymer extrusion stage, before they are even spun into yarn. In this process, the color pigments are added to the liquid polymer solution (dope) before it is extruded into fine fibers. This results in fibers that are already colored throughout during spinning rather than to color the fabric with traditional dyeing. Dope dyeing is known for its environmental benefits since it reduces water consumption and pollution associated with traditional dyeing methods.

ADVANTAGES OF MICROFIBER DOPE DYED YARN:

* Excellent Color Fastness:

The fibers are fully impregnated with pigment since colorant is added before knitting. Color fastness reaches 4-4.5 degrees, no color bleeding.

* Large Variety of Pattern Designs:

With various of colored yarn, we can design much more patterns for microfiber towels instead of just solid colors.

* Environmentally Friendly:

- Water consumption: up to 96% reduced
- Greenhouse gas emissions: up to 71% reduced
- Energy consumption: up to 87% reduced
- Less dyeing chemical consumption to reduce water pollution

(Data from "Sustainable Textile Production - Use of Dope-Dyed Yarn" by the Hohenstein Institute)

THE APPLICATIONS OF MICROFIBER DOPE-DYED YARN

Microfiber kitchen towels were once limited to plain, solid colors, which seemed mundane when compared to the vast array of options available with cotton kitchen towels. However, thanks to the advancement in microfiber dope-dyed yarn technology, Pa Tin Da has introduced a diverse collection of microfiber kitchen towels adorned with stylish and classic patterns.

In contrast to cotton kitchen towels, microfiber options boast numerous advantages:

Absorption and Quick Drying: great for quickly drying dishes, spills, and surfaces.

Lint Free: beneficial for tasks that require streak-free cleaning, such as wiping glass and mirrors.

Durability: durable and can withstand frequent washing without losing their effectiveness or softness.

Non-Abrasive: soft and non-abrasive, suitable for delicate surfaces like glass and stainless steel.

MICROFIBER WITH ADVANCED ANTIMICROBIAL TECHNOLOGY- SILVADUR™

Advanced, Sustainable, Microbial Control

- Using a patented, controlled-release technology, SILVADUR™ delivers a low concentration of silver ions to fabric surfaces to control malodor-generating bacteria.
- The revolutionary technology contained in SILVADUR™ is the world's first and only aqueous-base silver-polymer delivery system.
- Patented Smart Release delivery system requires less silver to eliminate bacteria, substantially reducing waste.

• SILVADUR™ is approved by bluesign® to be recyclable, reusable and ecologically friendly

• SILVADUR™ is certified by Oeko-tex® to be safe and non-sensitizing

Microbial Significantly Reduce to Avoid Cross-infection during Cleaning

	Staphylococcus Aureus (% Reduction in Boilerplate)		Klebsiella Pneumoniae (% Reduction in Boilerplate)	
	Initial Value	50x	Initial Value	50x
Not Applied	–	–	–	–
Applied SILVADUR	>99.9%	>99.9%	>99.9%	>99.9%

50x: 50 washes according to ASTM 61-2A standard

Microfiber Antibacterial Cleaning Cloths & Mops

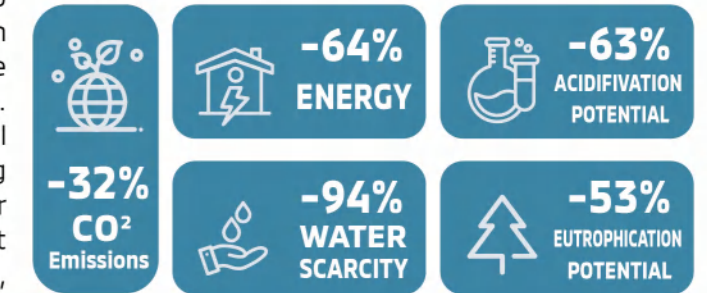

Treated with SILVADUR™, Pa Tin Da's Microfiber cleaning cloths and mops excel not only in cleaning, but also offer end users a remarkable and durable anti-microbial function. This feature effectively prevents cross-infection and odors during the cleaning process.

Save Our Planet by Cleaning with Recycled Microfiber Cleaning Products

Today, almost 1.5 billion plastic bottles are thrown away every day all over the world, and it can take up to 700 years for just one plastic bottle to break down in a process called biodegrading, which is also the process that happens when a piece of fruit rots. These bottles fill up our landfills, and we need landfill space to bury trash that can't be recycled. Throwing away plastic also hurts the environment in other ways. As plastic decays, it can give off chemicals that get into our water and air and can make people, plants, and animals sick. To solve these problems, people have worked together to develop a process to recycle plastic bottles and convert them into other useful items, including clothes, furniture, fences, and new plastic bottles, bags, and containers.

Why choose rPET?

Statics from PE International and was titled "Life cycle Assessment of Recycled Polyester Fiber: Comparison with Virgin Polyester Fiber" (PE International, 2010)

Pa Tin Da rPET Microfiber Products

PATINDA, certified by GRS (Global Recycled Standard) has taken part in the development of a process to recycle material from used PET bottles to produce cleaning cloth, towels, mops and other textile products in order to reduce the plastic waste and to protect the planet. With the new technology we can transfer used plastic into new high quality products, which would not effect the cleaning effect or durability.

rMWJ-020 Microfiber RPET Cleaning Cloth

Warp knitting terry cloth, 100% recycled polyester from post-consumer PET bottles, helps to tackle pollution and reduce CO2 emissions.

rMP-001 Microfiber RPET Pocket Mop

Microfiber mop made of 100% recycled polyester from post-consumer PET bottles, which can be recycled after use.

COMPOSITION	80% rPET, 20% PA	100% rPET
KEY POINT	partly recycled	100% recycled
ABSORBENCY	630%	630%
COLOUR FASTNESS	3.5	4.5
CLEANING ABILITY	almost streak-free in wet cleaning	leave more little water drops on the surface after wet
DURABILITY	★★★★★	★★★★★
RECYCLABLE	✗	✓

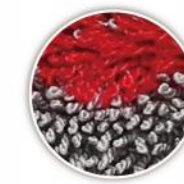

MICROFIBER MOPS DESIGNED FOR PROFESSIONAL CLEANING:

- Made from super-absorbent microfiber material
- Reduces bacteria approximately 95% compared to traditional mops
- Over 4 times proven labor saving
- Picks up 75% more dirt and dust per swipe than traditional mops
- Can be laundered over 300+ times

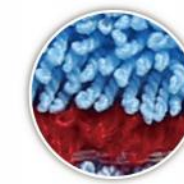

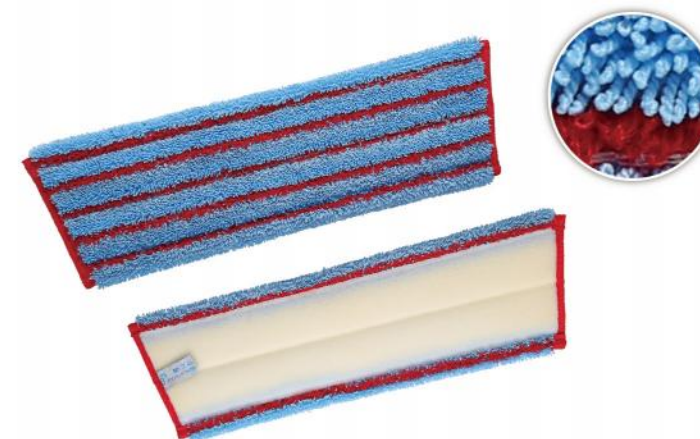

Suitable for Different Surfaces:

**MV-001
Microfiber Trapezoid Scrubbing
Twisted Mop**

The unique combination of microfiber and PP abrasive material is specifically designed to deliver a thorough cleaning without requiring additional effort. This design is durable and robust, allowing for easy washing and reuse without encountering any issues.

Material: Microfiber + PP Size: 18"/24" Weight: 85g, 110g

**MV-002
Microfiber Trapezoid Scrubbing
Twisted Mop**

The unique combination of microfiber and PP abrasive material is specifically designed to deliver a thorough cleaning without requiring additional effort. This design is durable and robust, allowing for easy washing and reuse without encountering any issues.

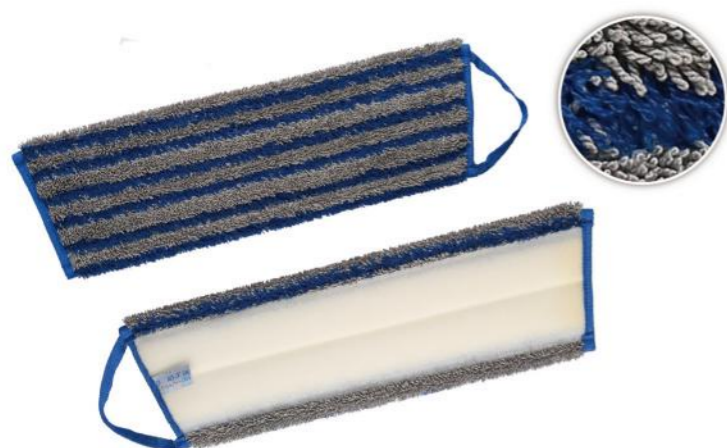

Material: Microfiber + PP Size: 18"/24" Weight: 85g, 110g

**MV-003
Microfiber Scrubbing Mop
PROFESSIONAL**

Great combination of microfiber with PP scrubbing material. Easier to remove stains. Trapezoid shape perfectly fit trapezoid shape mop frame to reach and clean corners.

Material: Microfiber+PP Size: 18"/24" Weight: 75g, 105g

MV-004
Microfiber Trapezoid Scrubbing Twisted Mop

Featuring an enhanced hard scrubbing design, this mop is ideal for effectively eliminating stubborn stains during wet mopping. It's well-suited for use in business and commercial areas, making the process of cleaning extremely dirty surfaces effortless.

Material: Microfiber+PP | Size: 18"/24" | Weight: 80g, 110g

MV-007
Microfiber Twisted Wet Mop BASIC

The unique twisted loop design ensures effective, streak-free cleaning on diverse flooring types. With strong absorbency and durability, it's an excellent choice for commercial and industrial use.

Material: Microfiber+Polyester | Size: 18" | Weight: 70g

MV-005
Microfiber Scrubbing Mop of Trapezoid Shape

The combination of scrubbing PET loops and microfiber loops enables efficient and rapid cleaning of tough and soiled surfaces. It's an excellent choice for heavy-duty cleaning of marble, ceramic, stone, and other hard floors.

Material: Microfiber+Polyester | Size: 18"/24" | Weight: 80g, 110g

MV-008
Microfiber Twisted Wet Mop

The most effective mop for wet cleaning of hard floors with high absorbing capacity. Microfiber twisted loops remove dirt easily. Special product for household, industrial and commercial cleaning. 4-color design for professional color-coding system.

Material: Microfiber | Size: 13"/18"/24" | Weight: 57g, 85g, 110g

MV-006
Microfiber Twisted Mop

The twisted pile structure of the mop enhances dirt and dust removal from surfaces. The mops with looped velcro securely attaches to the frame and can be taken off easily. Ideal for household, commercial, and industrial cleaning. It's color-coded and equipped with hanger for convenient store and carrying.

Material: Microfiber+Polyester | Size: 18"/24" | Weight: 75g, 105g

MV-009
Microfiber Scrubbing Mop PROFESSIONAL

The scrubbing stripes on the mop deliver a more robust cleaning performance in challenging areas without causing damage to the floor surface. This mop is an ideal choice for professional cleaning, particularly recommended for schools and business centers.

Material: Microfiber+ PP | Size: 18"/24" | Weight: 105g, 140g

MV-010
Microfiber Scrubbing Mop

Special model for cleaning in hospitals, schools, airports and so on. Scrubbing lines help to clean dirty hard surface without any damaging. Great for removing the stubborn stain during wet cleaning. Scrubbing lines trap hairs and dust for dry mopping.

Material: Microfiber + Polyester | Size: 18"/24" | Weight: 85g, 115g

MV-013
Microfiber Twisted Stripes Mop

The combination of white microfiber loops and blue PET loops minimizes friction during mopping. This mop is ideal for wet cleaning of hardwood, laminate, and ceramic floor.

Material: Microfiber+Polyester | Size: 18"/24" | Weight: 105g, 135g

MV-011
Microfiber Twisted Stripes Mop PROFESSIONAL

Twisted abrasive blue stripes remove very stubborn dirt and reduce friction during mopping. The Velcro backing ensures secure attachment to the frame.

Material: Microfiber+PP | Size: 18"/24" | Weight: 100g, 135g

MV-014
Microfiber Mop

Thick microfiber pad reaches deep into cracks and pick up more dust and dirt than traditional mop. Suitable for cleaning ceramic tile, ceramic, linoleum, hardwood and laminate floor.

Material: Microfiber / Polyester | Size: 18"/24" | Weight: 100g, 135g

MV-012
Microfiber Scrubbing Twisted Mop PROFESSIONAL

The scrubbing zigzag structure is designed for effectively cleaning tougher surfaces and possesses a strong capability to remove stubborn stains.

Material: Microfiber + PP | Size: 18"/24" | Weight: 105g, 135g

MV-015
Microfiber/PET Blended Twisted Wet Mop BASIC

Blended with microfiber and PET, the mop ensures effortless cleaning while effectively removing more dirt. It's designed to gather and eliminate even smaller dust and particles.

Material: Microfiber+Polyester | Size: 18"/24" | Weight: 75g, 110g

MV-016
Microfiber Mop with Fringe

The unique fringe design increases the mop's contact area to effectively gather big debris during mopping, which significantly enhances work efficiency. The ultra-fine fibers in the middle enable a more thorough cleaning of the floor surface.

Material: Microfiber+Polyester | Size: 18" | Weight: 80g

MV-021
Microfiber Dusting Mop With Velcro

The mop's fringe edge functions as a dust magnet to collect dust, pet hair and small particles from the floor easily.

Material: Microfiber+PET | Size: 18", 24", 36", 60", 72" | Weight: 150g, 190g, 265g, 405g, 485g

MV-017
Microfiber Mini Twisted Wet Mop BASIC

Twisted loop structure creates excellent sliding effect and dirt absorption. Small compact size provides effective cleaning of small surface area, deep cleaning in the corners and hard-to-reach places.

Material: Microfiber+Polyester | Size: 13" | Weight: 40g

MP-028
Microfiber Dusting Mop With Pocket

The mop's fringe edge effortlessly gathers particles, especially in corners and tight spaces. It functions as a dust magnet, effectively collecting dust, pet hair and crumbs from the floor. The grey microfiber base is excellent at picking up dust. Suitable for big space dusting such as hotel lobbies, waiting halls, airport and so on.

Velcro and pocket backing available.

Material: Microfiber | Size: 18"/24", 36"/48" | Weight: 115g, 160g, 210g

MV-018
Microfiber Coral Fleece Dusting Mop

High-quality microfiber coral fleese is perfect for dusting. The ultra-fine fibers generate static while mopping, which effectively attract and capture dust.

Material: Microfiber | Size: 18"/24" | Weight: 80g, 105g

MP-029
Acrylic Mop

The acrylic fibers have a natural static properties. The mops is made of acrylic fibers to efficiently collect and hold onto dust, reducing the likelihood of dust particles being spread around.

Material: Acrylic | Size: 60cm | Weight: 135g

The tufting mop can be produced with microfiber yarn, a blend of cotton yarns, or a combination of multiple yarn types based on the desired cleaning outcome. You have the option to select yarns of varying colors to create mops with distinct patterns. The inventive chain stitching design offers prolonged durability and superior cleaning efficacy compared to traditional long-loop mops. It excels at holding substantial moisture to cover larger areas effectively.

MV-019
Microfiber Tufting Blended Mop BASIC

Ideal for maintenance cleaning and deep cleaning of hard or smooth floor. Tufting yarn structure provides more effective cleaning than cotton mop with high water absorption and moisture capacity, more durable in use. Designed with velcro backing.

Material: Microfiber+PET | Size: 18"/24" | Weight: 140g,180g

MV-020
Microfiber Tufting White Mop

The microfiber tufting mop achieves surface cleaning of up to 50 m² using a single mop! Experience substantial liquid absorption of up to 750 ml. Consistent and even wetting from the first square meter to the last. Designed with velcro backing.

Material: Microfiber+PET | Size: 18"/24" | Weight: 140g,180g

MP-001
Tufting Microfiber Mop PROFESSIONAL

Mixed colors tufting mop made from special blended yarn, providing massive liquid absorption to cover large cleaning area. Designed with universal pocket and flaps.

Material: Microfiber+PET | Size: 40cm, 50cm | Weight: 170g,225g

MP-002
Tufting Microfiber Mop PREMIUM

White with blue stripes tufting mop made from special blended yarn, providing massive liquid absorption to cover large cleaning area. Designed with universal pockets and lasches to fit most of mop holders.

Material: Microfiber+PET | Size: 40cm, 50cm | Weight: 170g,220g

MP-003
Tufting Microfiber Blend Mop PREMIUM

Mixed colors tufting mop made from special blended yarn, providing massive liquid absorption to cover large cleaning area. Designed with universal pockets and lasches.

Material: Microfiber+PET | Size: 40cm, 50cm | Weight: 170g,220g

MP-004
Tufting Cotton Mop PREMIUM

Cotton and microfiber blend mop.
Loop-pile inside, microfiber loop-fringe outside.

Material: Cotton+ Polyester+ Microfiber
Size: 40cm
Weight: 130g

MP-005
Tufting Cotton Mop PREMIUM

Cotton and microfiber blend mop.
Loop-pile inside, cotton loop-fringe outside.

Material: Cotton+ Polyester+ Microfiber
Size: 40cm
Weight: 130g

MP-006
Tufting Cotton Blend Mop BASIC

Cotton and polyester blended yarn.
Loop-pile inside, cut fringe outside.
Ideal for dusting and moist mopping.

Material: 30% Cotton+ 70% Polyester
Size: 40cm, 50cm
Weight: 165g, 200g

MP-007
Tufting Cotton Stripe Mop PREMIUM

Cotton and polyester blended yarn,
tufted on a strong base fabric, long service life.

Material: 30% Cotton+ 70% Polyester
Size: 40cm, 50cm
Weight: 160g, 200g

MP-008
Tufting Cotton Stripes Mop PREMIUM

Cotton and polyester blended yarn,
tufted on a strong base fabric, long service life.

Material: 30% Cotton+ 70% Polyester
Size: 40cm, 50cm
Weight: 160g, 200g

MP-009
Tufting Cotton Blend Stripes Mop PREMIUM

Cotton and polyester blended mop,
highly absorbent to deal with dust, dirt,
and debris.

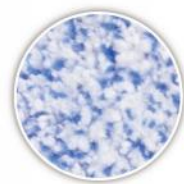

Material: 30% Cotton+ 70% Polyester
Size: 40cm
Weight: 165g

MP-010
Microfiber Mop BASIC

Made from super-absorbent micro plush fabric. The best and economic mop for universal cleaning on all types of surface.

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 90g, 110g

MP-011
Microfiber Mop BASIC

Universal pocket mop for cleaning and maintenance. Ideal for wet and dry cleaning.

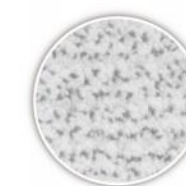

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 85g, 105g

MP-012
Microfiber Mop BASIC

Universal pocket mop for cleaning and maintenance. Ideal for wet and dry cleaning.

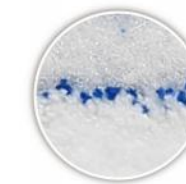

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 90g, 110g

MP-013
Microfiber Mop BASIC

Universal pocket mop with plastic flaps. Ideal for wet and dry cleaning. Designed with flaps.

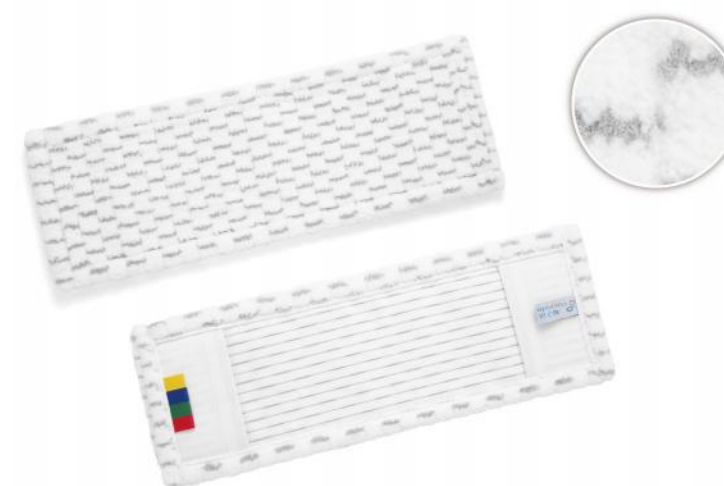

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 115g, 135g

MP-014
Microfiber Stripe Mop PREMIUM

Universal pocket mop made from super-absorbent micro plush fabric with blue stripes for slightly rough surfaces.

Material: Microfiber+Nylon | Size: 40cm, 50cm | Weight: 100g, 115g

MP-015
Microfiber Dot Mop PREMIUM

Universal pocket mop made from super absorbent micro plush fabric with grey bristles for slightly rough surfaces.

Material: Microfiber+nylon | Size: 40cm, 50cm | Weight: 80g, 95g

**MP-016
Microfiber Bristle Mop**

Ideal for cleaning slightly rough surfaces, providing excellent scrubbing power by the blue stripe bristles, and good sliding properties.

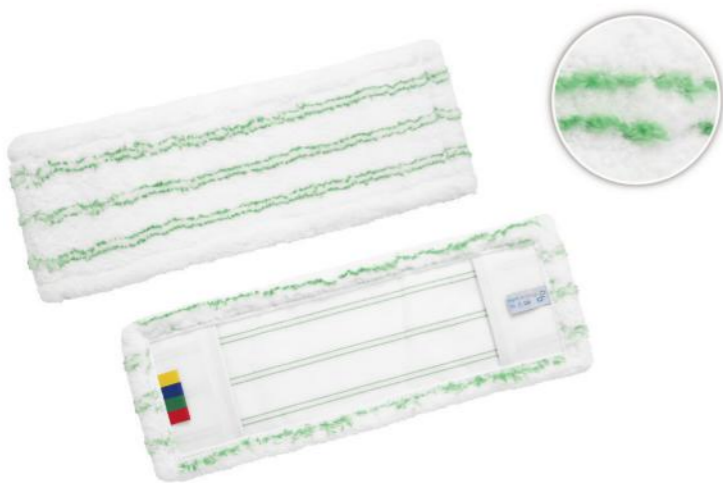

Material: Microfiber+Nylon | Size: 40cm, 50cm | Weight: 75g, 90g

**MP-017
Microfiber Bristle Mop**

Ideal for cleaning slightly rough surfaces, providing excellent scrubbing power by the blue stripe bristles, and good sliding properties.

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 80g, 100g

**MP-018
Microfiber Stripe Mop PREMIUM**

Universal pocket mop made from super-absorbent micro plush fabric with green strips for slightly rough surfaces.

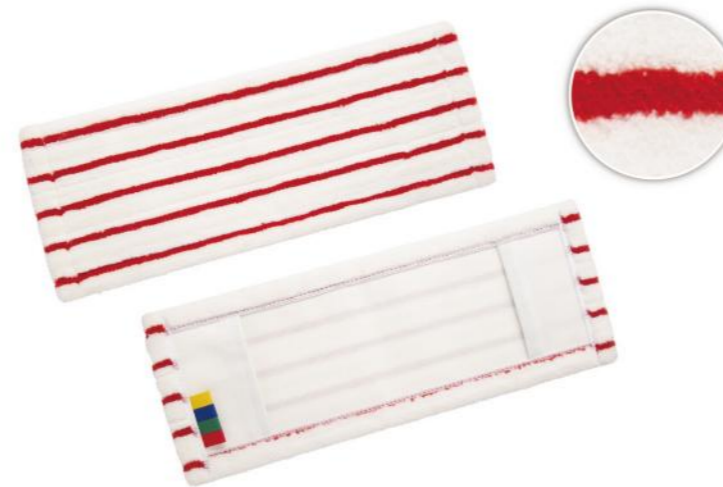

Material: Microfiber+Nylon | Size: 40cm, 50cm | Weight: 85g, 105g

**MP-019
Microfiber Blend Mop**

Universal pocket mop made from super-absorbent micro plush fabric with green strips for slightly rough surfaces.

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 85g, 105g

**MP-020
Microfiber Abrasive Mop PREMIUM**

Universal pocket mop made from super-absorbent micro plush fabric with abrasive property to clean stubborn stains.

Material: Microfiber+PET | Size: 40cm, 50cm | Weight: 80g, 95g

**MP-021
Microfiber Plush Mop**

Made from super-absorbent micro plush fabric. Ideal for dry cleaning. Designed with single lash.

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 85g, 105g

MP-022
Microfiber Scrubbing Mop

Ideal for both dry and wet cleaning, providing excellent scrubbing power by the blue stripe bristles, and good sliding properties.

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 85g, 105g

MP-023
Microfiber Twisted Mop

Ideal for both dry and wet cleaning. An economic mop for professional cleaning and household cleaning.

Material: Microfiber+PET | Size: 40cm, 50cm | Weight: 100g, 120g

MP-024
Microfiber Chenille Mop

Ultra soft fabric, ideal for cleaning smooth and delicate surfaces.

Material: 100% polyester | Size: 40cm, 50cm | Weight: 140g, 180g

MP-025
Microfiber Fringed Mop PREMIUM

Universal pocket mop made from white micro-plush for smooth surfaces. Fringes design to gather dust, hair and particles easily.

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 130g, 160g

MP-026
Microfiber Fringed Mop BASIC

Universal pocket mop made from micro-plush for smooth surfaces.

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 130g, 160g

MP-027
Tufting Microfiber Mop BASIC

Tufting mop made from super-absorbent microfiber yarn, providing massive liquid absorption to cover large cleaning area. Designed with pockets and lashes.

Material: Microfiber+Polyester | Size: 40cm, 50cm | Weight: 170g, 220g
