Base: MABS recycled 100 % (PIR)

"Welcome" logo printing in gray on the cover

A new standard of hygiene.

In public spaces, ensuring a clean and hygienic environment is essential for everyone's health. Liquid or foam soap dispensers provide a hygienic alternative by avoiding direct contact with surfaces that could harbor bacteria.

The use of paper dispensers also offers significant advantages: disposable paper guarantees greater cleanliness.

Another important aspect is the order and tidiness these devices ensure by eliminating solid soap residues on sinks and preventing paper rolls from being left in disarray.

Investing in quality dispensers means improving the user experience, ensuring cleaner environments, and contributing to sustainability by reducing excessive resource consumption. A small measure that makes a big difference for hygiene and everyone's well-being.
